## DETAILED ACTION

### Reasons for Allowance

1. Claims 1-2, 6-11 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the closest prior art of record, Kimoto (US 6,424,365), fails to anticipate or render obvious limitations from independent claim 1 such as "An image forming apparatus having an automatic double- side unit and being capable of effecting printing on both surfaces of a paper sheet, comprising: first sensor which measures a size of the image formed on the first surface of the sheet by measuring a passage time of the predetermined image formed on the first surface of the sheet, when the image formed on the first surface of the sheet is subjected to thermal fixation and conveyed; second sensor which measures a size of the image formed on the second surface of the sheet by measuring a passage time of the predetermined image formed on the second surface of the sheet, when the image formed on the second surface of the sheet is subjected to thermal fixation and conveyed; and calculation section which calculates correction data for a printing magnification for image formation on the second surface of the sheet, on the basis of a speed of conveyance of the paper sheet, a passage time of the predetermined image measured by the first sensor, and a passage time of the predetermined image measured by the second sensor".

Regarding claims 2, 6-8, claims 2, 6-8 are allowable due to dependence from the respective base claim 1.

Regarding claim 9, the closest prior art of record, Kimoto (US 6,424,365), fails to anticipate or render obvious limitations from independent claim 9 such as "An image forming apparatus having an automatic double- side unit and being capable of effecting printing on both surfaces of a paper sheet, comprising: first sensor which measures a size of the image formed on the first surface of the sheet by measuring a passage time of the predetermined image formed on the first surface of the sheet, when the image formed on the first surface of the sheet is subjected to thermal fixation and conveyed; second sensor which measures a size of the image formed on the second surface of the sheet by measuring a passage time of the predetermined image formed on the second surface of the sheet, when the image formed on the second surface of the sheet is subjected to thermal fixation and conveyed; and calculation section which calculates correction data for a printing magnification for image formation on the second surface of the sheet, on the basis of a speed of conveyance of the paper sheet, a passage time of the predetermined image measured by the first sensor, and a passage time of the predetermined image measured by the second sensor".

Regarding claim 10, claim 10 is allowable due to dependence from the respective base claim 9.

Regarding claim 11, claim 11 is the method of a device claim 9. Therefore, claim 11 is allowable due to the same reasons provided in claim 9.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
